

# What is REVERSE 911?

## REVERSE 911

Is a communication tool that utilizes a database of telephone numbers and addresses, which are associated with GIS mapping technologies to deliver emergency notifications to the community via telephone.

## Using REVERSE 911

Emergency officials can quickly target a geographic area and potentially reach thousands of people each hour by phone, text or email messages. Under extreme circumstances, residents and businesses would potentially receive an alert in the event of:

- Flood
- Severe Weather Conditions
- Evacuations
- Wildfires
- Hazardous Materials Spill
- Crime
- Boil Water Advisories
- Other Critical Notifications

Landline users are already registered to receive **REVERSE 911** notifications, but cell phone users are not.

**Free sign up to receive REVERSE 911 emergency notification on your cell phone and/or email at:**

Warner's home page @ <http://www.warner.nh.us>  
or  
NH States ENS @  
<http://www.nhe911.org/selfregistration/>
